Accounting clerk

Average salary: $49,000+
Career trend: declining slightly

Job description

Accounting clerks maintain and review financial records, monitor creditor and debtor accounts, and calculate the cost of wages and business operations.

What accounting clerks do

Accounting clerks are integral to all industrial, corporate and government sectors because every organisation must keep, maintain and analyse financial records.

Unlike accountants who analyse data, accounting clerks record data. They play an important role in the day-to-day work of finance and payroll departments.

Every company has their own policies and internal procedures for reporting and analysing financial data. Accounting clerks expand on their general knowledge of accounting and auditing principles to build company-specific skills.

Working alongside senior accountants and auditors, they perform a wide range of functions to ensure that files, financial records and ledgers are accurate. They regularly process invoices, expenses, payroll, and other financial transactions.

In smaller companies, accounting clerks perform general duties while in larger organisations they may have a specialised role. For example, an auditing clerk ensures company records are accurate and comply with local, state and federal laws while a payroll clerk deals with pay and payroll tax.

You’ll like this job if...

You’re organised. You communicate effectively. You enjoy working independently and as part of a team. You think critically and solve problems using logical analysis. You like computers. You use discretion with confidential employer and employee information. You can focus for long periods of time. You are comfortable with rules and processes.

Will I get a job?

- While this employment area is very large, with 126,600 workers in Australia now, it is expected to decline by 8,400 jobs over the next four years.

What will I earn?

- $951 to $1,100 median full-time weekly salary (before tax, excluding super).

Roles to look for

- Accounting clerk
- Cost clerk
