Crop farmer

Average salary: $57,200
Career trend: some growth

Job description

Whether it’s growing organic heirloom tomatoes or acres of wheat, crop farmers cultivate high quality and high yielding produce. Crop farming involves a thousand different tasks, but you’ll gain satisfaction making things grow and knowing that you’re providing food, feed and fuel for our growing population.

What crop farmers do

Crop farmers perform manual labour from morning to night. They need physical strength, stamina, and vast agricultural knowledge to ensure their fields are well maintained so they can till, plant, fertilise, cultivate and harvest their produce. Crop farmers also need to know how to run a business.

Throughout the growing season, they scout and tend every field to ensure it’s growing into healthy, mature crops. During the off-season they spend time servicing their tractors, combines and planters, which are essential to their work.

Crop farmers are also busy year-round exploring new ways to become more efficient and lessen their farm’s impact on the environment by learning about new crop practices and equipment.

Technological advances in agriculture also see crop farmers installing GPS devices in their tractors so they can collect and analyse data and improve their processes.

You’ll like this job if...

You’re good at physical labour, critical thinking, and running a business. You enjoy a variety of tasks, a quick pace and you can multi-task. You like to focus on the facts and details. You apply common sense to come up with practical solutions to problems. You’re sensitive and cooperative.

Will I get a job?

• Some growth is expected in this occupation over the next four years, with 600 new jobs in Australia, bringing the total to 41,600.

What will I earn?

• $1,100–$1,350 median full-time weekly salary (before tax, excluding super).

Roles to look for

• Cotton grower
• Flower grower
• Floriculturist
• Fruit or nut grower or farm manager
• Grain, oilseed or pasture grower or farm manager
• Grape grower
• Mixed crop farmer
